1. Background

On 6-8 December 2016, Dubai hosted one of the biggest international conferences on quinoa titled “**Quinoa for Future Food and Nutrition Security in Marginal Environments**”. Held under the patronage of Her Excellency Sheikha Lubna bint Khalid Al Qasimi, Minister of State for Tolerance of the UAE and President of Zayed University, the conference was organized by the International Center for Biosaline Agriculture ([ICBA](#)) in collaboration with the [Ministry of Climate Change and Environment of the United Arab Emirates](#), [Zayed University](#), the Islamic Development Bank ([IsDB](#)), the Arab Bank for Economic Development in Africa ([BADEA](#)), and with the technical contribution of the Food and Agriculture Organization of the United Nations ([FAO](#)). A media campaign was carried out and a press conference organized to build public awareness for this event and ensure necessary publicity. A total of **313** international, regional and national media outlets, as well as a number of TV channels, reported on the event. Below is a summary of media coverage of the event.

Farming in the desert: Quinoa could transform agriculture in the Gulf

By RJ Whitehead , 14-Dec-2016

 Post a comment

Related tags: Middle East, UAE, Dubai, Gulf, Agriculture, Farming, Quinoa

Experts have urged Gulf states to look to an Andean super-food beloved of hipsters as a staple crop at a time when groundwater supplies are shrinking and becoming more saline.

Quinoa, which needs a fraction of the water required to cultivate wheat, maize or rice, and can thrive in regions of high salinity, has been undergoing trials at two farms in the UAE that had earlier been abandoned because of too much salt in the groundwater.

WHAT'S ON

Quinoa: The superfood that could feed the UAE in the future...

Quinoa's called a superfood for a reason.

Not only is it super-high in both protein and fibre, the little seed called quinoa may be the thing to save us from a future food shortage in the UAE according to experts.

Yesterday, **more than 150 leaders**, policymakers, scientists, experts and professionals from over 46 countries came together at Zayed University in Dubai to share the latest developments in quinoa research, production and trade worldwide.

Why should I care, you ask? Well this meeting is all about how **quinoa could be successfully cultivated in countries** affected by water scarcity and salinity (and the UAE is one of them).

ثاني الزيوودي: «الكينوا» تحقق الأمن الغذائي في مستقبل الإمارات

المصدر: دبي- سعيد الشناحي

التاريخ: 07 ديسمبر 2016

1 ثاني الزيوودي وعدد من المشاركين خلال المؤتمر الصحفي

قال معالي الدكتور ثاني الزيوودي وزير التغير المناخي والبيئة إن دولة الإمارات تنفق مبالغ ضخمة على استيراد الأعذية، بينما يمكن تقليل كميات الاستيراد من خلال زراعة المحاصيل الدبلة التي تتأقلم مع المناخ، ومنها الكينوا الدبلة عن القمح والتي أثبتت مقاومتها للأجواء الحارة والجافة، ويمكن زراعتها في مناطق عديدة من الدولة باختلاف تضاريسها، مشيراً إلى أن الكينوا تعد رافداً اقتصادياً ويمكن لزارعتها أن تتطور وهي ورفة رابحة لمواجهة الطلب المتنامي على الغذاء في المستقبل.

الإمارات الان - ثاني الزيودي: «الكيinoa» تحقق الأمن الغذائي في مستقبل الإمارات . اليوم الأربعاء 07 ديسمبر 2016

قال مهالي الدكتور ثاني الزيودي وزير التغير المناخي والبيئة إن دولة الإمارات تفتق مبالغ ضخمة على استيراد الأغذية، بينما يمكن تقليل كميات الاستيراد من خلال زراعة المحاصيل البديلة التي تتألف من المانج ومنها الكيinoa البديلة عن القمح والتي أثبتت مقاومتها للآفات الحارة والجافة، ويمكن زراعتها في مناطق عديدة من الدولة باختلاف تضاريسها مشيراً إلى أن الكيinoa تعد رافداً اقتصادياً ويمكن لزراعتها أن تتطور وهي رافدة لمواجهة الطلب المتنامي على الغذاء في المستقبل.

دبي تستضيف أكبر مؤتمر دولي حول "الكيوفا"

دبي، الإمارات العربية المتحدة، 6 ديسمبر 2016- اجتمع اليوم حشد من كبار المسؤولين والعملاء والخبراء من مختلف أنحاء العالم في أكبر مؤتمر دولي مخصص للحديث عن "الكيوفا" منذ إعلان الأمم المتحدة العام 2013 العام الدولي للكيوفا.

يضم المؤتمر أكثر من 150 من القادة وصانعي السياسات والعملاء والخبراء والمختصين الذين يمثلون أكثر من 46 دولة، الذين اجتمعوا على مدى ثلاثة أيام لمناقشة وتبادل المعلومات والخبرات حول أحدث التطورات في أبحاث الكيوفا وإنتاجها وتجارتها حول العالم، والتوصل إلى عدد من التوصيات بشأن زراعتها في البيئات الهامشية التي تتأثر بندرة المياه والملوحة.

وتشير التوقعات إلى احتمال زيادة سكان العالم إلى نحو 9,7 مليار نسمة بحلول عام 2050 ومن ثم تزايد المخاوف حول عدم كفاية الزراعة لإنتاج ما يكفي من الغذاء لولاء البشر.

وحسب بعض التقديرات، فإن إنتاج الغذاء ينبغي أن يزداد بنحو 60 في المئة سواء من خلال زيادة إنتاجية المحاصيل في كل مساحة زراعية أو التوسع في الأراضي المسالحة للزراعة بحلول عام 2050 لتلبية الطلب. وعلاوة على ذلك، فمن المتوقع أن يشهد العديد من المناطق التي تعتمى بالفعل من سوء التغذية ونُدرة المياه وتدهور التربة تزايداً كبيراً في عدد سكانها، ما يؤثر على إنتاجها حول ما إذا كانت لأساليب الزراعة التقليدية وأنواع المحاصيل قادرة بالفعل على الحفاظ على أهداف الإنتاج الغذائي العالمي.
